# Getting Started

## ■ Software Covered by This Manual

- This manual covers the following software.

fx-9860GII Manager PLUS

fx-9750GII Manager PLUS

GRAPH75+ E Manager PLUS

GRAPH35+ E Manager PLUS

- Emulator Graphic

The following shows the emulator graphics displayed by each type of software.

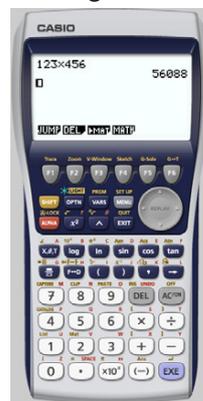

fx-9860GII  
Manager PLUS

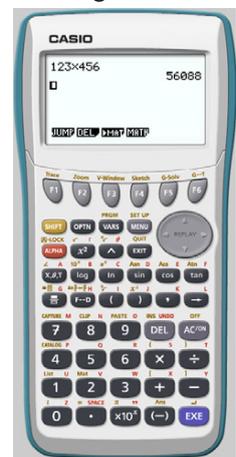

fx-9750GII  
Manager PLUS

GRAPH75+ E  
Manager PLUS

GRAPH35+ E  
Manager PLUS

- Though the calculator operations you perform with the emulator graphic are different for each type of software, operation of the software itself is the same in all cases.
- The operations in this manual are based on the fx-9860GII Manager PLUS software. You can perform the same operations for other software.

## ■ About fx-9860GII Manager PLUS

- fx-9860GII Manager PLUS is an emulator that lets you perform fx-9860GII operations on your computer.
- You can record key operations you perform on the emulator as “Key-Log records”, and edit Key-Log records as required.
- The keys on the Key-Log editor screen as well as the emulator LCD screen contents can be pasted into other applications. This means that emulator data can be used to create assignments, tests, and other materials.
- A presentation feature lets you play back saved Key-Log records.
- You can connect your fx-9860GII unit to your computer and display its contents on your computer screen.

### ***Important!***

- Be sure to install the software before you connect fx-9860GII to your computer. Connecting before you install the software can result in improper operation.

## ■ Using This Manual

- For details about operation of the fx-9860GII Graphic Scientific Calculator, see the user documentation that comes with the calculator.
- The procedures in this manual assume that you are already familiar with the following standard computer operations.
  - Menu operations using the mouse, including: clicking, double-clicking, dragging, etc.
  - Text input using the keyboard
  - Icon operations, general window operations, etc.
  - If you are not familiar with these types of operations, refer to the user documentation for your computer.
- The screen shots shown in this manual are all from the English version of Windows® 8.1.
- Note that the actual appearance of the screen that appears when using this software depends on your computer system setup and on the operating system you are using.
- Screen shots shown in this User’s Guide are intended for illustrative purposes only. The actual text and values that appear on display may differ from the examples shown in this User’s Guide.

## ■ System Requirements

- Operating Systems: Windows 7 (32-bit/64-bit), Windows 8.1 (32-bit/64-bit), Windows 10 (32-bit/64-bit)  
Your hardware configuration needs higher than functionalities that operating system recommends.
- Computer: Computer with one of the Windows operating systems pre-installed (Excluding computers with an upgraded operating system and self-built computers.)
- Disk Space: 100MB for installation and uninstall
- Note: Actual requirements and product functionality may vary based on your system configuration and operating system.
- Other: Video adapter and display must support resolution of XGA (1024×768) or higher, 16 bit or higher system color.  
Internet Explorer® 7 or later.  
Adobe® Reader® 8.0 or later.  
Microsoft® Excel® 2007 or Microsoft Excel 2010

# 1. Installing and Uninstalling the Software

## To install the software

1. On your computer, double-click the fx-Manager PLUS application EXE file.
2. Perform operations as instructed by the text that appears on the screen.

## To uninstall the software

Use Windows Control Panel to uninstall the software.

## To start up the software

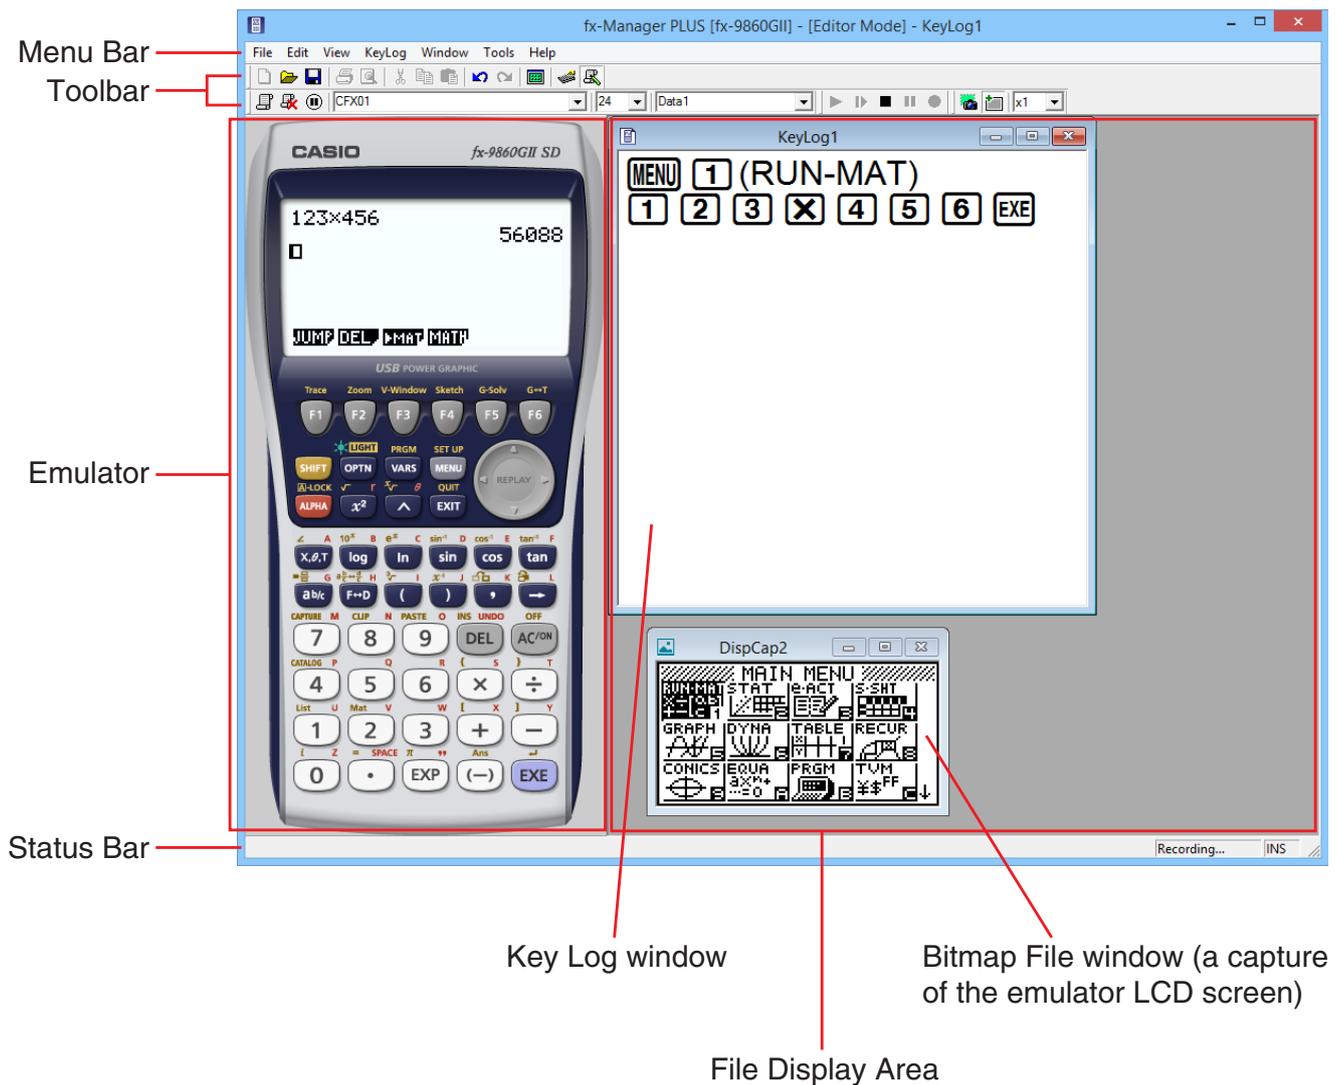

1. On your computer's desktop, click the "fx-Manager PLUS Subscription" icon.

- Starting up this application for the first time will display a dialog box for selecting a calculator model. Select a calculator model and then click [OK].

## 2. Screen Configuration

The following shows the fx-9860GII Manager PLUS screen.

\* When you have both the emulator window and Key-Log (or bitmap file) window open on the display, the emulator window always will be displayed on top.

# Menu Bar

- If a menu command can also be executed by clicking a toolbar button, the applicable toolbar button is also provided.

## ■ File Menu

Menu	Toolbar Button	Description
New		Creates a new Key-Log file.
Open...		Opens an existing file.
Close		Closes the currently open file.
Capture Screen		Captures the emulator screen.
Save		Saves the current work file, overwriting the previous (unedited) version.
Save As...		Saves the current work file under a new name.
Print...		Prints the currently displayed bitmap file.
Print Preview		Displays a preview of the print image.
Print Setup...		Displays the print setup dialog box.
(File History)		Shows up to four of the last files you worked on.
Change Calculator Model and Exit...		Displays a dialog box for selecting a calculator model to be emulated. Clicking [Save and Exit] will exit this application. The next time you start up this application, the emulator that was selected when you clicked [Save and Exit] will appear on the display.
Exit		Exits this application.

## ■ Edit Menu

Menu	Toolbar Button	Description
Undo		Undoes the last operation.
Redo		Redoes the last undone operation.
Cut		Moves the selected data to the clipboard.
Copy		Copies selected data to the clipboard.
Paste		Pastes the clipboard contents.
Clear		Deletes the selected data.
Select All		Selects all Key-Log records.

\* The Edit menu is disabled during emulator operation.

## ■ View Menu

Menu	Submenu	Description
Calc Key	Normal	Selects normal-size calculator keys.
	Large	Selects large-size calculator keys.
Calc Screen	×1	Specifies an actual size display.
	×2	Specifies a 2X size display.
	×3	Specifies a 3X size display.
	×4	Specifies a 4X size display.
	×5	Specifies a 5X size display.
Tool Bar	Standard	Toggles display of the standard toolbar on and off.
	Log	Toggles display of the log toolbar on and off.
	Edit	Toggles display of the edit toolbar on and off.
	Bitmap	Toggles display of the bitmap toolbar on and off.

## ■ Key-Log Menu

Menu	Toolbar Button	Description
Add		Adds a new Key-Log record (Key-Log editor mode only).
Delete		Deletes the currently displayed Key-Log record (Key-Log editor mode only).
Emulator		Enters the emulator mode.
Editor		Enters the Key-Log editor mode.
Auto Play		Starts Key-Log auto playback.
Step Play		Starts Key-Log manual playback.
Stop		Stops Key-Log playback or recording.
Pause		Pauses Key-Log playback.
Record		Starts Key-Log recording.
Insert Pause		During Key-Log editing, inserts a pause character into Key-Log playback (Key-Log editor mode only).

## ■ Window Menu

Menu	Description
Tiled	Displays all windows in a tiled configuration.
Horizontal	Displays all windows in a horizontal line.

- The Window menu also shows the names of files that you have open. When you have multiple files open, the file name at the top of the list is the one you are currently working with the active file.

## ■ Tools Menu

Menu	Toolbar Button	Description
Screen Receiver		Starts up Screen Receiver.
Options...		Displays a dialog box for configuring optional settings.

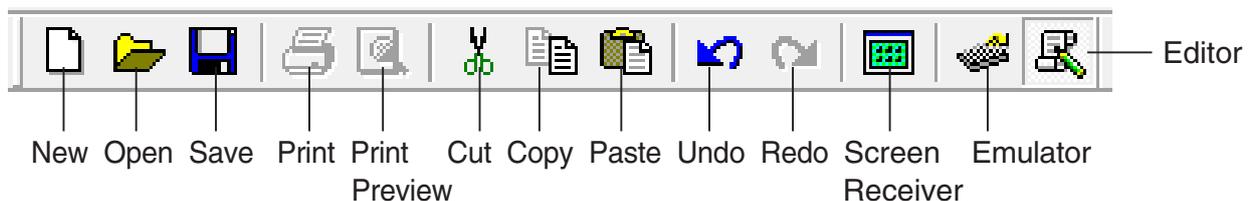

## ■ Help Menu

Menu	Submenu	Description
Manual	Calculator	Links to <a href="https://world.casio.com/manual/calc/">https://world.casio.com/manual/calc/</a> . Download the Calculator User's Guide there.
	Manager PLUS	Displays the fx-Manager PLUS User's Guide.
	Activation	Displays the Activation User's Guide.
License		Displays the end user license agreement.
About...		Displays version information.
Activation...		Displays the activation screen. For details, see the Activation User's Guide.

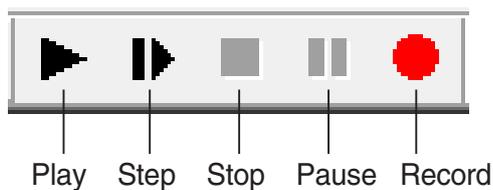

## Toolbar

- The toolbar buttons correspond to menu bar commands. See the section of this manual that explains the menu bar for details about each button's function.

### ■ Standard Toolbar

### ■ Log Toolbar

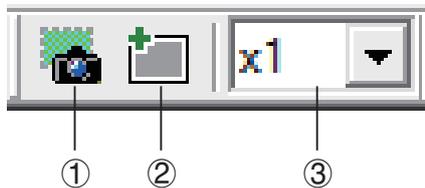

## ■ Edit Toolbar

- ① Add
- ② Delete
- ③ Insert Pause
- ④ Font ... Specifies the font of input text.
- ⑤ Font Size ... Specifies the font size of input text.
- ⑥ Key-Log Record ... Selects the Key-Log record to be played back or edited.

## ■ Bitmap Toolbar

- ① Capture Screen
- ② Outer Frame  
Specifies an outer frame for screen captures.
- ③ Bitmap Size  
Specifies the bitmap size. A setting of 1 through 10 can be selected.

---

## Status Bar

- ① Help text is displayed here.
- ② Displays the process currently being performed.
- ③ Toggles between the insert and overwrite modes.

# 3. Emulator Mode and Key-Log Editor Mode

fx-9860GII Manager PLUS has two modes.

You can use either of the following to operations to select the mode you want.

- On the [KeyLog] menu, select either [Emulator] or [Editor].
- On the standard toolbar, click  or .

## Emulator Mode

Use this mode when you want to perform mainly emulator operations.

## Key-Log Editor Mode

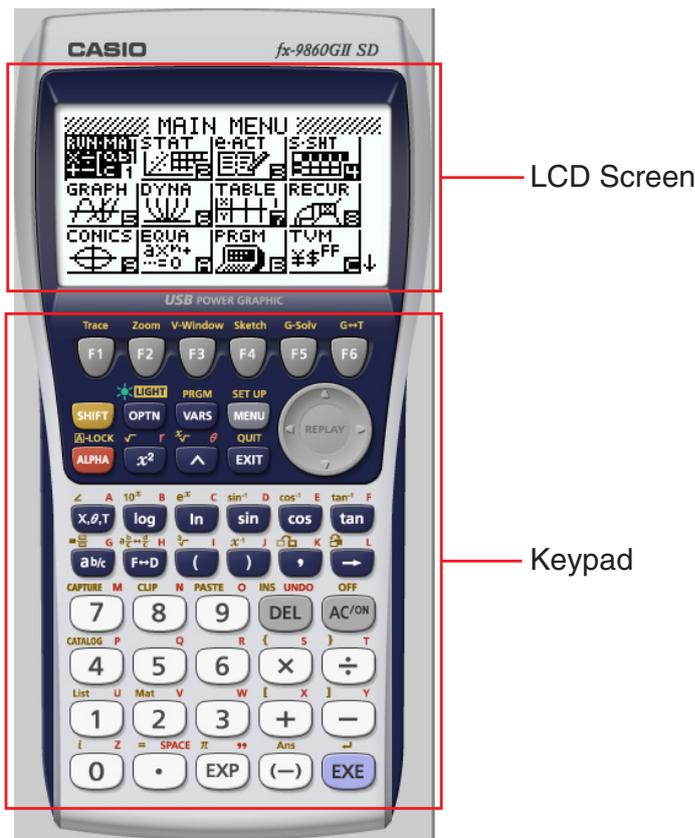

Use this mode when you want to perform mainly Key-Log data operations.

# 4. Emulating fx-9860GII Calculator Operation

- The emulator makes it possible to mimic fx-9860GII calculator operation using your computers mouse and keyboard.
- For details about emulator operations, see the fx-9860GII User’s Guide.
- Note that some emulator functions are different from the functions of the fx-9860GII calculator. For details, see “9. Differences between fx-9860GII Calculator and fx-9860GII Manager PLUS Functions” (page EN-27).

## ■ Using the Emulator

- Key operations are identical to those you perform on the calculator.
- Operation results appear on the LCD screen.

In the Emulator Mode, you use your computer keyboard to operate the emulator. The following explains the keyboard keys you should use to perform each emulator key operation.

(1) Computer keyboard keys that have the same key markings as the emulator keys

**0**—**9**, **.**, **+**, **-**, **(**, **)**, **,**, **^**, **F1**—**F6**, **▲**, **▼**, **◀**, **▶**

(2) Computer keyboard keys that have different key markings as the emulator keys

Computer Key	Emulator Key
[Tab]	
[Insert]	
[Home]	
[Page Up]	
[Page Down]	
[End]	
[Esc]	
[Delete]	
[Back Space]	
[Enter]	
[*]	
[/]	

## ■ Changing the Size of the Emulator

You can select one of two sizes for the emulator's keypad and one of five sizes for the display area.

### To specify the size of the keypad

1. On the [View] menu, select [Calc Key].
2. From the submenu that appears, select the keypad size you want.

### To specify the size of the LCD screen

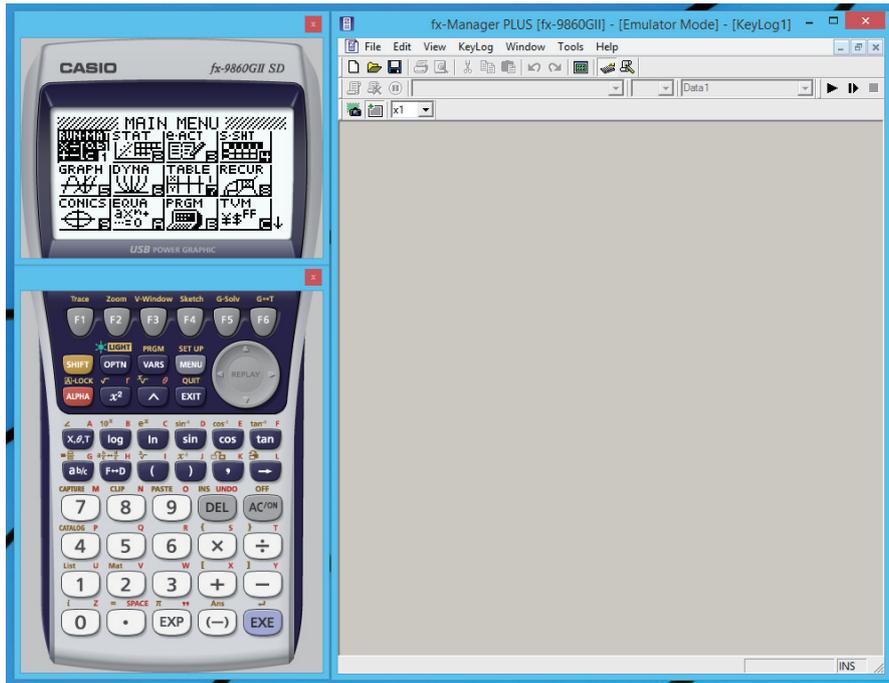

1. On the [View] menu, select [Calc Screen].
2. From the submenu that appears, select the LCD screen size you want.

## ■ Using the Floating Emulator Feature

- You can drag the LCD screen and the keypad to any location you want on your computer screen.
- You can display the emulator LCD screen and its keypad in their own windows that are separate from the main window.

### To make the LCD screen and/or keypad a floating window

1. Double-click the LCD screen and/or keypad.
2. Drag the LCD screen and/or keypad to the left so it is outside of the main window, and drop it there.

### ■ Moving the LCD Screen and Keypad Back into the Main Window

- Perform the following steps to move the LCD screen and/or keypad back into the main window from independent floating windows.
  - Double-click the floating LCD screen and/or keypad.
  - Drag the LCD screen and/or keypad back to the left side of the main window.

#### **Important!**

- You can return an independent floating window to the main window by dragging the floating window to the left side of the main window only. Dragging top, bottom, or right side of the main window will not work.

## ■ Capturing the Emulator LCD Screen Image

- You can use the following procedure to capture an image of the emulator LCD screen.

### To capture the emulator LCD screen image

1. On the [File] menu, select [Capture Screen] to display a capture of the emulator LCD screen (page EN-6).
  - You could also click  on the bitmap toolbar.
  - You can also add a frame to the captured image or change the image zoom factor, if you want. For details, see “Bitmap Toolbar” (page EN-11) and “LCD Screen Capture Settings” (page EN-21).
  - If either a window containing of a captured image or the Key-Log screen is currently maximized (using the Windows maximize command) on your computer display, any window produced by the capture operation will also be maximized. This is true regardless of the size setting specified for screen capture on the Options dialog box (page EN-21).
2. Select the captured screen image window and then click  to save it to a file.
  - \* You can save a screen capture as either of the two following file formats.
    - Monochrome bitmap format
    - JPEG formatThis application uses libraries by the Independent JPEG Group.

## ■ Opening a Saved LCD Screen Image

- You can open a saved LCD screen image and display it on your computer. You can have multiple screen images open at the same time.
- LCD screen images can be copied and pasted into other applications in order to create operation example handouts, assignments, etc.
  - \* Only bitmap files can be opened using this procedure. Opening of JPEG files is not supported.

### To copy an LCD screen image and paste it into another application

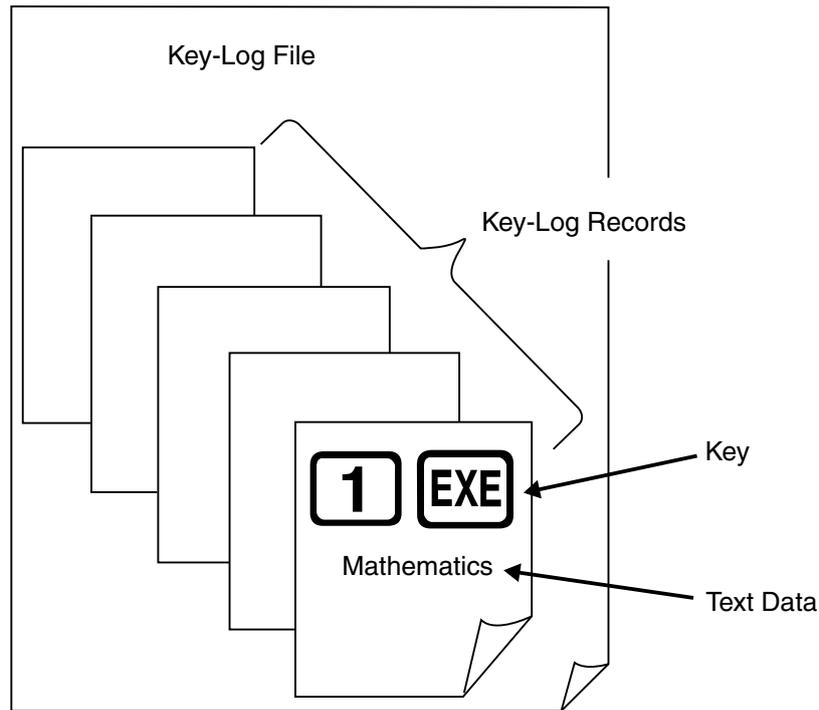

1. Click  and then open the file that contains the LCD screen image you want to copy.
2. Select the LCD screen image window and then click  to copy it to the clipboard.
3. Open the other application and then paste the contents of the clipboard.

# 5. Using the Emulator Key-Log

This section explains how to use the Key-Log, which is a log of the emulator's key operations. It also covers playback of recorded key operations and editing of Key-Log records. All of the operations in this section are performed using toolbar buttons.

## ■ Key-Log File Structure

A Key-Log file can contain multiple Key-Log records. Key-Log records contain recorded key operations and text. The following shows the Key-Log file structure.

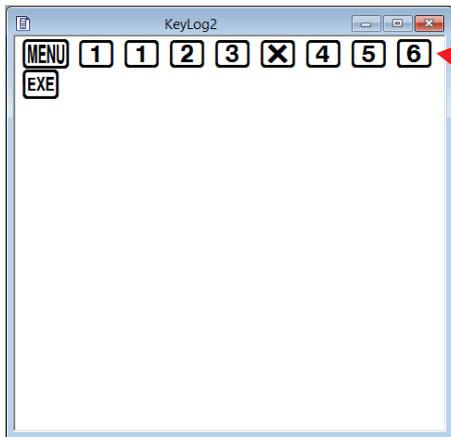

- You can assign names (up to 20 single-byte characters) to Key-Log records.

### ***Important!***

- Key-Log data processing can take a long time when there is a lot of data. This is normal and does not indicate malfunction.
- Only key operation procedures are stored in a Key-Log file. Because of this, replaying Key-Log contents starting from an initial screen that is different from the one that was displayed when the data was originally stored may produce different results.
- A key operation may not be stored to a Key-Log if you click it while an emulator calculation operation is in progress.

## To record emulator key operations using Key-Log

1. Click  to start Key-Log recording.
2. Perform operations on the emulator.

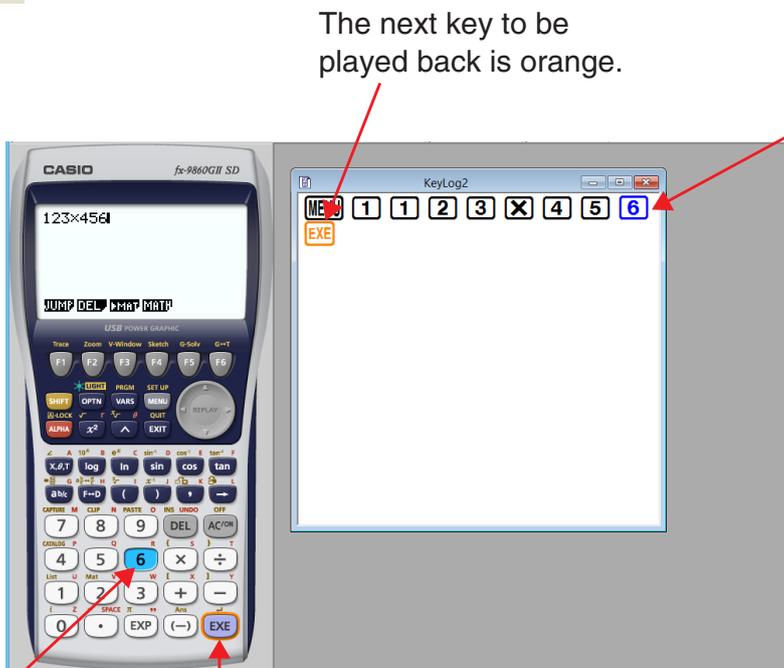

Keys appear in the sequence you press them.

3. Click  to stop Key-Log recording.
4. Click  to save the Key-Log file.

## To perform Key-Log auto play of a recorded key operation

1. Click  and then open the Key-Log file you want to play.
2. Click  to start playback.

The next key to be played back is orange.

Played key operations are blue.

The last played key is blue.

The next key to be played is framed in orange.

- Click  to pause playback.
- Click  to restart playback after pausing it.

3. To stop playback, click . Stopping playback causes all keys to return to their original colors.

### Note

- You can use the optional settings dialog box (page EN-21) to configure playback settings like the key playback interval following a pause, the color of playback keys, etc.
- Simultaneous playback of multiple Key-Log files is not supported. If you try to open a Key-Log file while another Key-Log file is already open, the currently open file will close automatically. If the currently open file has been edited, a message “At least one file has unsaved edits. Save edits?” will appear asking if you want to save it before closing.

## To playback a Key-Log record manually (STEP playback)

1. Click  and then open the Key-Log file you want to play.
2. Click  to play the first key operation in the Key-Log.
3. Keep pressing  to play Key-Log contents one step at a time.
4. To stop playback, click .

## To edit a Key-Log record

1. Click  and then open the Key-Log file you want to edit.
2. Select the Key-Log record you want to edit.

Select the Key-Log record from this menu.

3. Edit the key operations and text of the Key-Log record.
  - You can use normal text input and editing operations to edit the keys in a Key-Log record.
  - When inputting text, you can specify the font and font size you want to use.

Font

Font Size

4. Click  to save the Key-Log file.

## To add a Key-Log record to the currently open Key-Log file

After opening the Key-Log file to which you want to add the record, click .

This automatically assigns the Key-Log record a name (Example: "Data1") and displays it in the menu.

## To rename a Key-Log record

1. Select the Key-Log record you want to rename from the menu.
2. Click the name of the Key-Log record and then change it.
3. Press the [Enter] key.

## To delete a Key-Log record

1. Select the Key-Log record you want to delete from the menu.
2. Click  to delete the selected Key-Log record and display the next one.

### **Note**

- There must be at least one Key-Log record in memory. You will not be able to delete a Key-Log record if it is the only one left in memory.

## ■ Inputting a Pause Character

A pause character causes Key-Log playback to pause automatically when it reaches the character.

To input a pause character, click .

## ■ Copying Keys or Text and Pasting It into Another Application

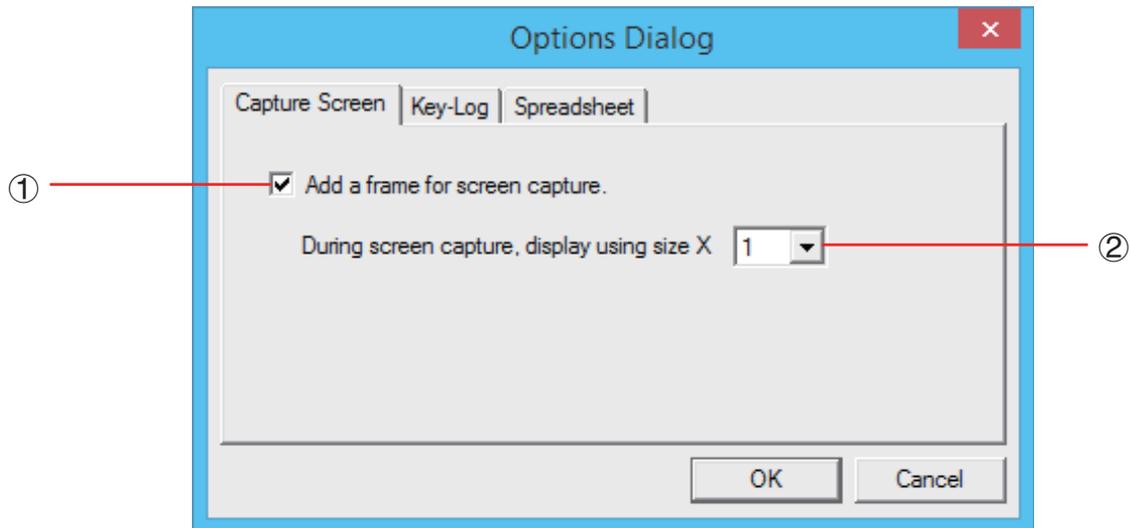

Keys and text can be copied and pasted into other applications in order to create operation example handouts, assignments, etc.

## To copy keys or text and paste it into another application

1. Drag the cursor across the keys or text you want to copy.
2. Click  to copy the selected keys or text to the clipboard.
3. Open the other application and then paste the contents of the clipboard.

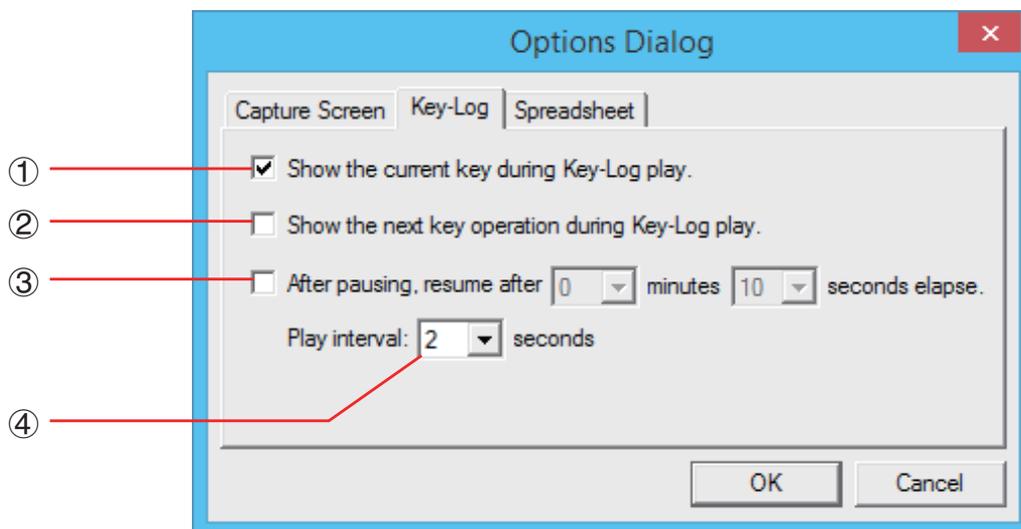

# 6. Configuring Options Dialog Box Setting

## ■ LCD Screen Capture Settings

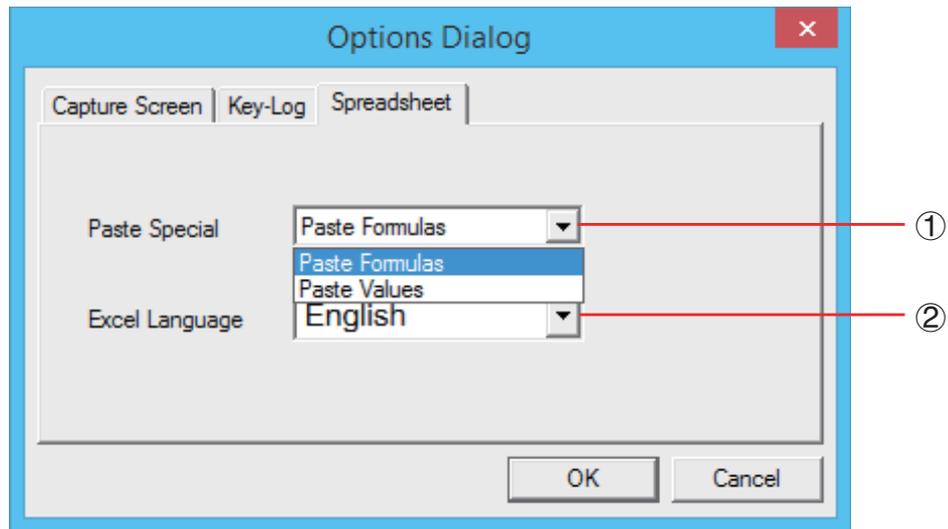

- ① Select this option to add a frame to an LCD screen capture.
- ② Specifies the screen size during LCD screen capture. You can select a setting in the range of 1 through 10.

## ■ Key-Log Playback

- ① Select this option to highlight the current key in blue.
- ② Select this option to frame the next key in orange.
- ③ Specifies how much time should be allowed to elapse to resume paused playback. You can set an interval in the range of 10 seconds to 10 minutes in 10-second steps.
- ④ Specifies the key playback interval during auto play. You can set an interval of 0.1 second, or any interval in the range of 0.5 to 5 seconds, in 0.5-second steps.

## ■ Spreadsheet Setting

- ① You can configure Copy & Paste so either values or Excel formulas are pasted into a spreadsheet.

Paste Formulas ... Pastes formulas.

Paste Values ... Pastes values only.

- ② You also can specify the language to be used when pasting to Microsoft Excel. Whenever you copy from Spreadsheet and paste to an Excel formula, the formula will be converted to the selected language.

Example: CellIf( → IF( : English  
                  → SI( : Spanish  
                  → SI( : French  
                  → WENN( : German

When using the following language versions of Excel, configure the Excel Language setting as shown below.

Arabic: English2

Slovenian: English3

Portuguese (European): PortugueseEu

Portuguese (Brazilian): PortugueseBr

- For details about copying and pasting Excel formulas, see page EN-32.

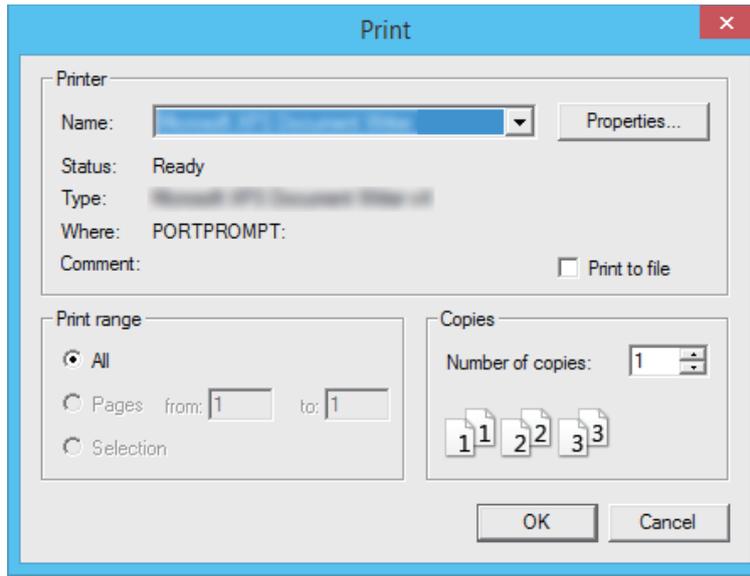

# 7. Other Functions

---

## Printing

- You can use the following procedure to print LCD screen captures.

1. Click the window of the LCD screen capture that you want to print to select it.
2. Click . This will display the Print dialog box.

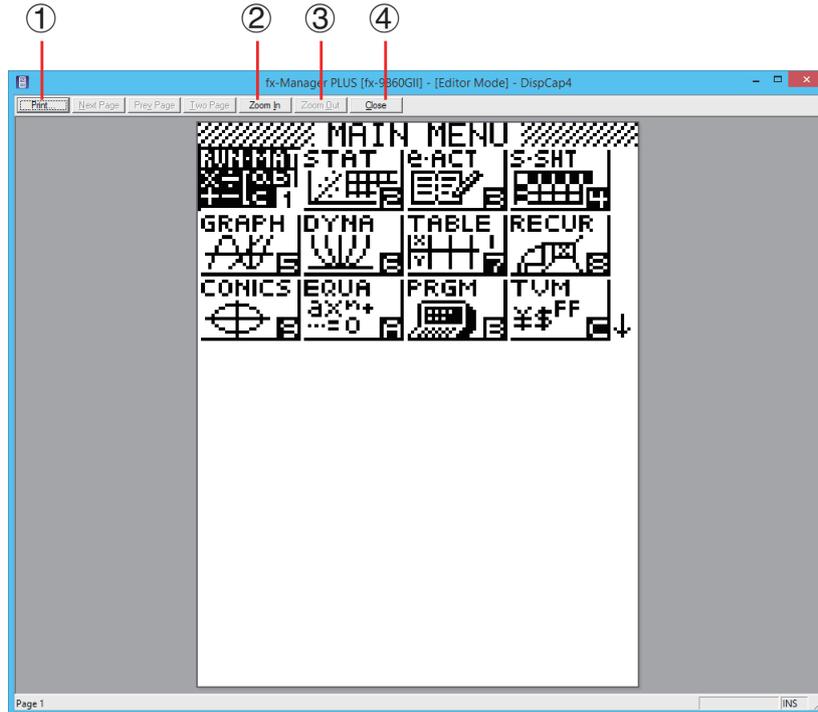

3. Click [OK] to start printing.

### **Important!**

- Each screen image is printed on a separate page.
- Images are printed in accordance with width setting of the paper size selected on the Print dialog box.
- If you are printing a bitmap image that was created using another application and does not fit within the preview area, only the part within the preview area will be visible. Also, only that part will be printed.

## ■ Print Preview

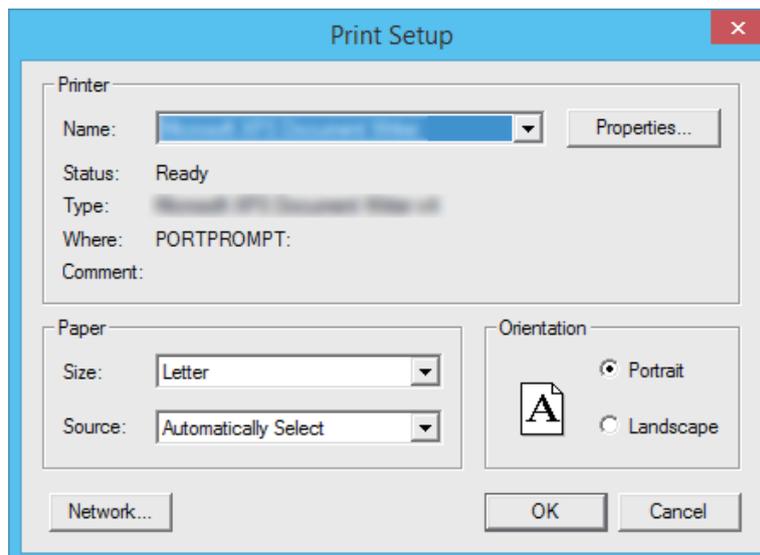

- Selecting [Print Preview] on the [File] menu displays the print preview image.

- ① Displays the Print dialog box.
- ② Enlarges the preview image.
- ③ Reduces the size of the preview image.
- ④ Closes the print preview window image.

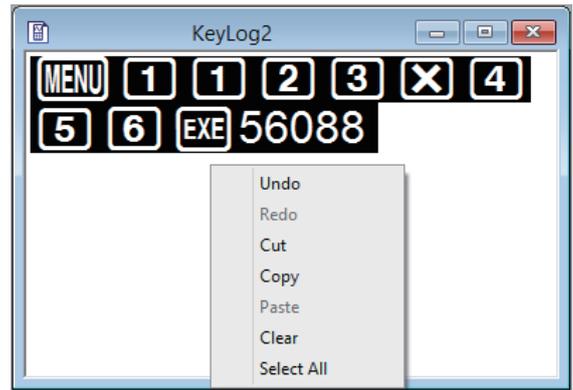

## ■ Print Setup Dialog Box

- Selecting [Print Setup] on the [File] menu displays the Print Setup dialog box.

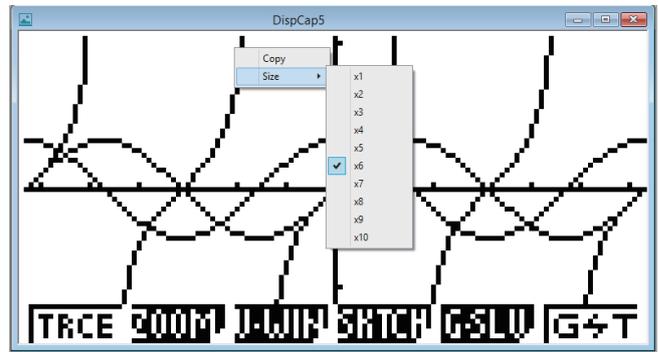

# Shortcut Menu

- Right-clicking the mouse displays one of the shortcut menus shown below.
- During Key-Log Editing

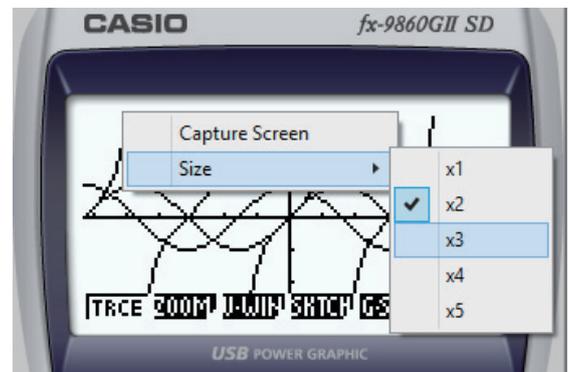

- During Bitmap Display of the Calculator Screen

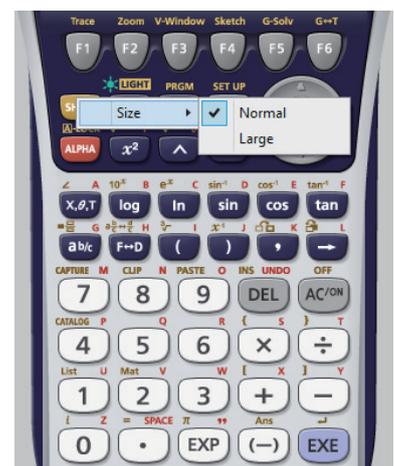

A screen zoom operation affects only the screen where you display the shortcut menu. If you have multiple screens on the display, the other screens are not affected by the zoom operation.

- When Using the Emulator

- On the Emulator Keypad

## 8. File Types Supported by fx-9860GII Manager PLUS

- fx-9860GII Manager PLUS supports files with the file name extensions described below.

Extension	Description	Supported Software
g1m	Emulator or calculator user memory data file (variables, programs, etc.)	All fx-Manager PLUS software
g2m	Emulator or calculator user memory data file (variables, programs, etc.)	Software after fx-Manager PLUS Ver. 2.0
g1e	eActivity file	All fx-Manager PLUS software (not including fx-9750GII Manager PLUS and GRAPH35+ E Manager PLUS)
g2e	eActivity file	Software after fx-Manager PLUS Ver. 2.0 (not including fx-9750GII Manager PLUS and GRAPH35+ E Manager PLUS)
g1a	Add-In application	All fx-Manager PLUS software (not including fx-9750GII Manager PLUS and GRAPH35+ E Manager PLUS)
g1l	Add-In message	
g1n	Add-In menu	
g1k	fx-9860GII Manager PLUS Key-Log file	All fx-Manager PLUS software
bmp	Bitmap file	All fx-Manager PLUS software

### **Note**

- You can use the MEMORY application to import all file types (except g1k) into the emulator.
- Files with the extension g1k can be used in Key-Log files.

# 9. Differences between fx-9860GII Calculator and fx-9860GII Manager PLUS Functions

## ■ eActivity Applications (SD Card Access) (Not included on the fx-9750GII/GRAPH35+ E)

Calculator: SD card access supported.

Emulator: Performing an operation that accesses an SD card displays a dialog box, which can be used to open an eActivity saved on your computer or save an eActivity on your computer. Trying to perform an optimize operation while accessing an SD card will cause an error.

**Example:** To use the emulator to create a new eActivity file (ABC.g2e) on an SD card (actually your computer's hard disk)

1. From the Main Menu, enter the e-ACT mode.

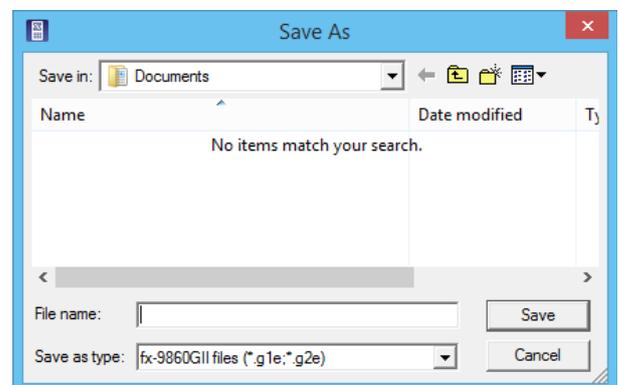

2. Click **F6** (SD).

- This displays the SD access screen.

3. Click **F2** (NEW).

- This displays a file name input dialog box.

4. Select the location on your computer where you want to save the file, input the file name (ABC.g2e), and then click [Save].

- This displays the eActivity file editing screen.

- \* Subsequent operations are identical to those you would perform on the calculator.
- \* After you are finished, perform the required operation to save the file.

**Example:** To use the emulator to open an eActivity file (ABC.g2e) that is stored on an SD card (actually your computer's hard disk)

1. From the Main Menu, enter the e-ACT mode.

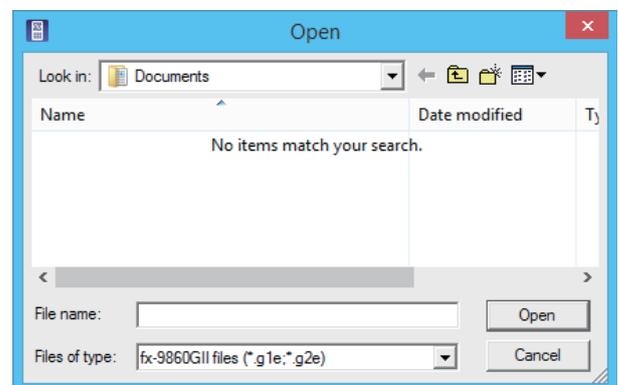

2. Click **F6** (SD).

- This displays the SD access screen.

3. Click **F1** (OPEN).

- This displays a file selection dialog box.

4. Type in the file name (ABC.g2e), and then click [Open].

- This displays the eActivity file editing screen.

## ■ LINK Application

Calculator: Data transfer execution supported.

Emulator: Data send/receive, and configuring cable, wakeup, and capture settings are not supported.

## ■ MEMORY Applications (SD Card Access)

Calculator: Data save to and data read from an SD card supported. (fx-9860GII SD only)

Emulator: Performing an operation that accesses an SD card displays a dialog box, which can be used to store data to a computer file and to import a file.

Trying to perform the SD card optimize operation on the emulator will cause an error.

SD card (actually your computer's hard disk) access can be performed by selecting either a folder or a file. What you select depends on the type of operation you want to perform.

### When to select a folder on your computer's hard disk

Select a folder on your computer's hard disk when you want to perform any one of the following operations.

- Copying main memory or storage memory contents to an SD card (actually your computer's hard disk)
- Loading backup data from an SD card (actually your computer's hard disk)
- Saving backup data to an SD card (actually your computer's hard disk)

**Example:** To use the emulator to save backup data to your computer

1. From the Main Menu, enter the MEMORY mode.

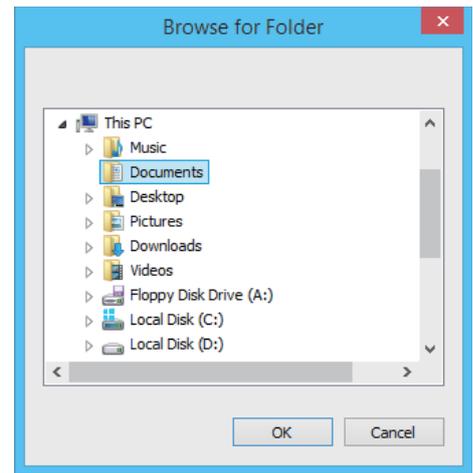

2. Click **F4** (BKUP) **F1** (SAVE).

- This displays the save location selection screen.

3. Click [2].

- This displays the folder selection screen.

4. Select the folder you want and then click [OK].

- The backup data is saved to the folder you select.

### When to select a file on your computer's hard disk

Select a file on your computer's hard disk when you want to perform the following operation.

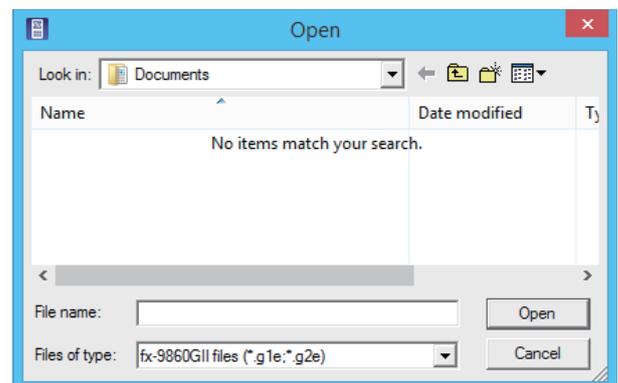

- Copying a file on an SD card (actually your computer's hard disk) to main memory or storage memory

1. From the Main Menu, enter the MEMORY mode.

2. Click [F3] (SD).

- This displays the file selection screen.

3. Select the file you want and then click [Open].

- This displays the main memory/storage memory selection screen.
- Selecting a destination (main memory or storage memory) will start the copy operation.

## ■ SYSTEM Applications (Contrast, Auto Power Off, Reset)

Calculator: Contrast adjustment, auto power off setting configuration, and SD card formatting supported.

Emulator: Contrast adjustment, auto power off setting configuration, and SD card formatting not supported.

## ■ Installing an Add-In (Not included on the fx-9750GII Manager PLUS/ GRAPH35+ E Manager PLUS)

You can perform the following procedure on the emulator to install an Add-In application, Add-In language, or an eActivity.

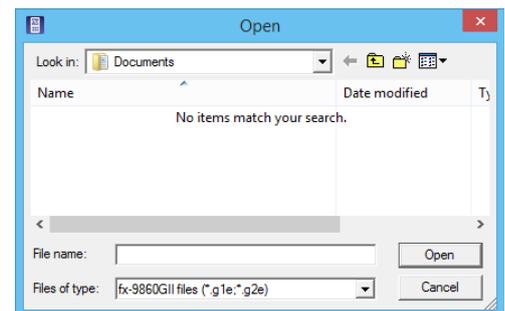

**Example:** To install an Add-In application

1. From the Main Menu, enter the MEMORY mode.

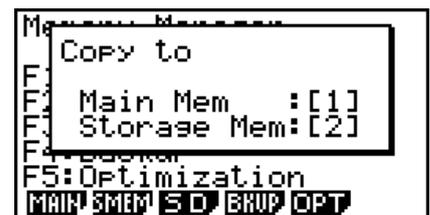

2. Click [F3] (SD).

- This displays a dialog box for opening a file.

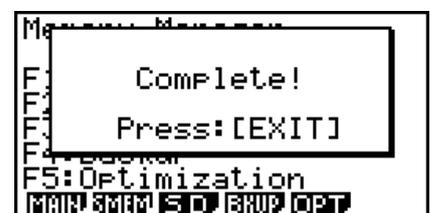

3. Select the Add-In file you want and then click [Open].

4. Click [2].

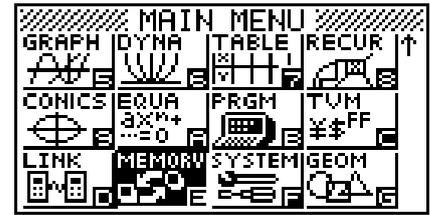

5. Click [EXE].

6. Click **EXIT**.

7. Click **MENU**.

- The icon of the application you just installed should be visible on the Main Menu.

- Some Add-In applications may act differently on the fx-9860GII calculator than they do on the emulator.

## ■ LIGHT Key (fx-9860GII/GRAPH75+ E only)

Calculator: Turns on the display backlight.

Emulator: No operation

## ■ OFF ( **SHIFT** + **AC** )

Calculator: Turns off power.

Emulator: Does not turn off the emulator. ( **SHIFT** + **AC** does not perform any operation.)

## ■ COPY & PASTE

Calculator: COPY & PASTE supported on the calculator.

Emulator: COPY & PASTE supported on the calculator, and between the calculator and other applications running on the computer.

Copy and paste of fx-9860GII calculator-specific input codes between fx-9860GII Manager PLUS and other applications is not supported in some cases.

Supports copy and paste between an emulator spreadsheet and an Excel spreadsheet running on your computer. (Not included on the fx-9750GII Manager PLUS)

- Copy and paste of the following formulas is supported between an emulator spreadsheet and an Excel spreadsheet running on your computer.

+, -, \*, /, ^, =, <>, >, <, >=, <=, \$, :

IF, MIN, MAX, AVERAGE, MEDIAN, SUM, PRODUCT

LOG, FACT, POWER, SQRT, LOG10, LN, PI

SIN, COS, TAN, ASIN, ACOS, ATAN, SINH, COSH, TANH, ASINH, ACOSH, ATANH

ABS, GCD, LCM, MOD, TRUNC, INT, ROUND, PERMUT, COMBIN, RAND, NOT, AND, OR

The table below shows how some formulas may be modified automatically when a paste operation is performed.

### Modified Formulas

Spreadsheet	Paste Operation*	Excel
×	↔	*
÷	↔	/
≠	↔	<>
≥	↔	>=
≤	↔	<=
Omitted multiplication sign	→	*
CellIf(	↔	IF(
CellMin(	↔	MIN(
CellMax(	↔	MAX(
CellMean(	↔	AVERAGE(
CellMedian(	↔	MEDIAN(

\* The following are the meanings of the symbols in the “Paste Operation” column of the above table.

↔: Either way

→: From emulator spreadsheet to Excel

←: From Excel to emulator spreadsheet

- For information about how formulas are modified when using a non-English version of Excel, see the Formula List (page EN-35).
- If a paste operation includes an unsupported formula or an operation whose value causes an error, only the final value will be pasted without the formula.
- If a formula being pasted into an emulator spreadsheet exceeds 255 bytes after being modified as described in the table above, only the final value will be pasted without the formula.
- An error will occur if the argument of a formula is outside the argument range of the location where it is being pasted.
- When pasting a formula with a relative cell reference (such as: =A1+1) from Spreadsheet to Excel, make sure you paste it into the cell with the same name as the cell you copied it from. Copying it into a different cell will cause an incorrect cell reference.

\*2) Pretvori samo decimalni simbol in ločilo. تحويل الرموز والنواصل العشرية فقط.

## Note

Some mathematical functions do not copy and paste correctly between Microsoft Excel 2010 and the Emulator Spreadsheet. Change the functions below in Excel to the proper function names.

	Pasted Function Name	Correct Function Name (Rename as shown below.)
Czech	NE	NENÍ
Danish	MIDDEL	GENNEMSNIT
	STØRSTE.FÆLLES.DIVISOR	FÆLLES.DIVISOR
	HELTAL	HEL
Hungarian	GCD	LKO
	LCM	LKT
Dutch	AFRONDEN	AFRONDING
	WORTEL	VWORTEL
Norwegian	STØRST	MAKS
Polish	LCM	NAJW.WSP.DZIEL
	MOD	NAJMN.WSP.WIEL
Portuguese (Brazilian)	MÍNIMO	MÍN
	MULT	PRODUTO
	DIST.NORMP	DISTNORMP
	FATORIAL	FATO
	TRUNCAR	TRUNC
Turkish	TOPLA	TOPLAM

## ■ Examination Mode

Calculator: Examination Mode supported.

Emulator: Examination Mode not supported.

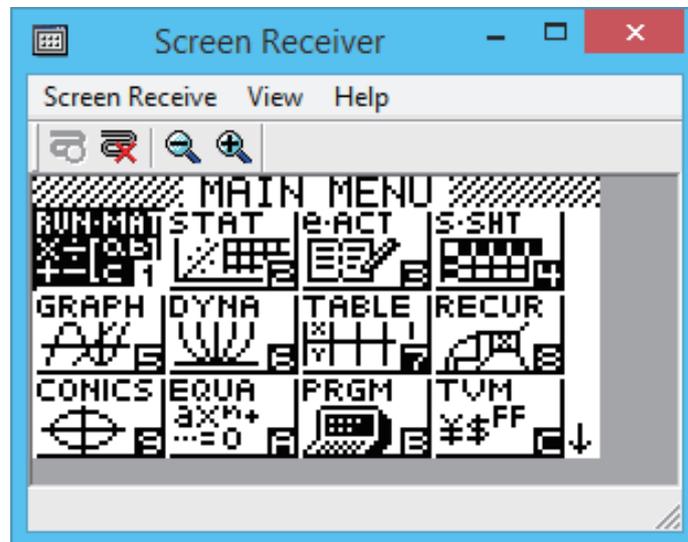

# 10. Using Screen Receiver to Display the Calculator Screen Image on Your Computer

## **Important!**

- A USB driver install dialog box will appear the first time you connect the fx-9860GII calculator to your computer with the USB cable. Follow the instructions that appear on the dialog box. Screen Receiver will not operate properly if you cancel the install operation.

## ■ To display the calculator screen image on your computer

1. Use the USB cable that comes with the calculator to connect the calculator to your computer.
  - For the fx-9750GII and GRAPH 35+, you will need to purchase the separately available FA-124USB.
  - This will display a dialog box on the calculator screen.
2. On the calculator, press **F4** (ScreenRecv).
3. On the [Tools] menu, select [Screen Receiver], or click  on the toolbar.
4. A short while after Screen Receiver starts up, an image of the calculator screen will appear on your computer.

5. Operate the calculator. When you do, the calculator screen image will change in real time on your computer.
6. You can enlarge the calculator screen image by clicking  and reduce its size by clicking .
7. To close the calculator screen image, click .
8. Disconnect the USB cable.

### **Important!**

- If the calculator screen does not appear, try disconnecting the USB cable and then restart the above procedure from the beginning. If the calculator screen still does not appear, check the points described below.

<b>If this is the problem:</b>	<b>Do this:</b>
The USB cable is disconnected.	Reconnect the USB cable.
There are multiple calculators connected.	Disconnect the other calculators so there is only one left connected.
There is another CASIO product connected with a USB cable.	Disconnect the other CASIO product.

## **■ Screen Receiver Menus**

### **Screen Receive Menu**

<b>Menu</b>	<b>Toolbar Button</b>	<b>Description</b>
Start		Displays the calculator screen image.
Stop		Closes the calculator screen image.
Exit		Exits Screen Receiver.

## View Menu

Menu	Submenu	Toolbar Button	Description
Expand			Enlarges the calculator screen image.
Reduce			Reduces the size of the calculator screen image.
Zoom*	×1		Shows the calculator screen image in actual size.
	×2		Shows the calculator screen image is ×2 size.
	×3		Shows the calculator screen image is ×3 size.
	×4		Shows the calculator screen image is ×4 size.
	×5		Shows the calculator screen image is ×5 size.
	×6		Shows the calculator screen image is ×6 size.
	×7		Shows the calculator screen image is ×7 size.
	×8		Shows the calculator screen image is ×8 size.
	×9		Shows the calculator screen image is ×9 size.
	×10		Shows the calculator screen image is ×10 size.
Toolbar			Toggles display of the toolbar on and off.
Status Bar			Toggles display of the status bar on and off.

\* The allowable zoom size is limited by the resolution of the computer.

About		Displays version information.

# 11. Error Message Table

## ■ fx-Manager PLUS

Message	Description	Required Action
An error occurred while reading the file <file name>. The file may be corrupted.	Wrong file format.	Check the file to see if it is corrupted.
There is no more playable data.	There are no playable keys to the right of the input cursor.	Move the input cursor to the left of the keys you want to play back, and perform the play operation.
You cannot delete all Key-Log records at once. Before deleting the selected record, first add new record.	You are trying to delete all Key-Log records, which is not allowed.	To delete all of the current records, first add a different record. At least one Key-Log record must be remaining in memory.
<file name> This file is read-only. Use a different file name.	You are trying to save a read-only Key-Log file after editing or recording to it.	Save the Key-Log file under a different file name.
A problem occurred while adding a Key-Log record. After confirming there is enough memory capacity to store the record, try again.	Some problem occurred while adding a Key-Log record.	Make sure there is enough free memory remaining to complete the operation and try again.
A problem occurred while writing to the file <file name> because not enough disk space is available. Check the remaining capacity of your disk and try again.	There is not enough disk space available to save the file.	Make sure there is enough free memory available and try again.
This application cannot be started up because the DLL version is wrong. This may be due to a problem during installation. Re-install the application.	Your computer has the wrong DLL version.	Installation may have failed, so re-install the application.
A problem occurred while reading file <file name>. The disk being read from may be damaged or may not exist. Check the disk and try again.	A problem occurred while reading from a disk.	Check the disk for data corruption and confirm that the disk exists. Then try again.
A problem occurred while writing file <file name>. The disk being written to may be damaged or may not exist. Check the disk and try again.	A problem occurred while writing to a disk.	Check the disk for data corruption and confirm that the disk exists. Then try again.

Message	Description	Required Action
A problem occurred while reading file <file name>. The file may have been moved or deleted.	A problem occurred when you tried opening a file from the list of previously opened files on the File menu.	Check to see if the file has been moved or deleted.
There is not enough memory. Increase memory capacity and try again.	There is not enough memory to perform the operation.	Increase memory capacity and try again.
A problem occurred while launching the emulator. Try re-starting the application. If you still cannot launch, it could mean that the emulator is damaged. Update the emulator or reinstall it.	A problem occurred during emulator startup.	Try restarting the application. If this does not work, it could mean that the emulator is damaged. Update the emulator or reinstall it.
A problem occurred while launching the manual (***.pdf) viewer. Download the viewer from the site below and reinstall it. <a href="http://get.adobe.com/reader/otherversions/">http://get.adobe.com/reader/otherversions/</a>	A problem occurred during manual viewer startup.	Download and install a new viewer from <a href="http://get.adobe.com/reader/otherversions/">http://get.adobe.com/reader/otherversions/</a> .
The following characters cannot be used in a Key-Log record name. :\/?*[]	The Key-Log record name you are trying to use contains an illegal character.	The following characters are not allowed in Key-Log record names. :\/?*[]
A system error has occurred. (1) Shut down all other applications that you are not currently using. (2) Check how much free space is available on your computer's hard disk. (3) Exit the emulator and restart it. If this does not correct the problem, it could be the emulator files have been corrupted. Please reinstall the emulator.	—	Follow the steps that are shown on the display and try again.
The path and/or filename exceeds the maximum length allowed by your Windows operating system.	The number of letters in the path or file name you specified exceeds the allowable limit.	Shorten the specified path or file name.

Message	Description	Required Action
A problem occurred while importing <file name>. Note that import of a file created on another model is not supported.	Some problem occurred while importing the file.	Make sure that the file was created using a calculator with the same model name as this calculator.
A Key-Log file cannot be created or opened while Key-Log data is being played back or recorded. Stop playback or recording and try again.	You are trying to create a new Key-Log file or open an existing Key-Log file while Key-Log data is being played back or recorded on the calculator.	Stop playback or recording and try again.
File Extension Error	The file you selected has an invalid file name extension.	Make sure that the extension of the file you are selecting is bmp or jpg.
<path> Invalid Extension	The file path you selected has an invalid file name extension.	Make sure that the extension of the file path you are selecting is bmp or jpg.
A problem occurred while accessing the registry. Check to make sure that the emulator is installed correctly.	Some problem occurred during registry access.	Re-installation of the emulator is recommended.
A system error has occurred. Exit the emulator and restart it. If this does not correct the problem, it could mean that the emulator file is damaged. Reinstall the emulator.	A system error occurred.	Re-installation of the emulator is recommended.
Invalid File Name	You specified an invalid file name.	Make sure that you are specifying the file name correctly.
Invalid Folder Name	You specified an invalid folder name.	Make sure that you are specifying the folder name correctly.
Too Many Files Selected	The number of files you selected exceeds the allowable limit.	Reduce the number of selected files.
This data was created by a different model or different version. Because of this, some key names may be wrong. Though the Key-Log will play back, some operations may not be performed correctly.	You are attempting to open a Key-Log file (g1k) whose version is older than that of the software you are currently running. Note that operations may not match the operations in the Key-Log file.	—

## ■ Screen Receiver

Message	Description	Required Action
<p>A connection could not be established.            Either the calculator is not connected or the connected calculator is not in the Screen Receiver Mode.            Correct the problem and try again.            For details, select the following on the menu bar: Help - Manual - Manager PLUS, or refer to the Manager PLUS user's guide.</p>	<p>You started a data communication operation while the USB cable was not connected.</p>	<p>Check for proper connection of the calculator to the computer and confirm that the calculator is in the Screen Receiver mode. Then try again.            See "10. Using Screen Receiver to Display the Calculator Screen Image on Your Computer" for details.</p>
<p>A problem occurred during communication.            Disconnect the USB cable, check the setup of the calculator, and try again.            For details, select the following on the menu bar: Help - Manual - Manager PLUS, or refer to the Manager PLUS user's guide.</p>	<p>Some problem occurred during data communication.</p>	<p>Disconnect the USB cable and check the setup of the calculation.
